

Strategy session 'Decarbonization of Shipping'

*'What will be the sustainable business models
in clean fuels for shipping?'*

3 DECEMBER 2020
ONLINE WORKSHOP
15.00 - 17.30 HRS

Registration:
coenfaber@bicepsnetwork.org

BICEPS Network and SHELL together organize this decarbonization strategy session for shippers to gain insights on sustainable fuel developments and how to influence their fast adoption

Leveraging forces for a better world

Active dialogue for faster adoption of innovations

Save The Date

The mission of the BICEPS Network is to jointly drive sustainability to the next level in the shipping sector. Therefore we organize this innovation workshop to boost sustainable change.

Date: Thursday 3 December 2020 (15.00 - 17.30 hrs CET)

Online: Interactive Workshop

In this workshop in a small setting we like to address the question “What can be the business model for sustainable fuels in shipping?”, and to define “How can shippers be an enabler?”

The session will be in two parts:

A. Presentation Shell – ‘Decarbonization strategy of shipping’ - Fuels of the Future scenarios: Shell shares their latest insights in clean fuels in shipping and transport – what are the transition pathways

B. Workshop ‘What could be viable business models for clean fuels in supply chains on the short term with bio-LNG and Biofuels? What are adoption strategies for carriers? How can shippers be an enabler?’

Are you interested?

Join the workshop!

We are looking forward meeting you!
